FUTURE
NOMADS

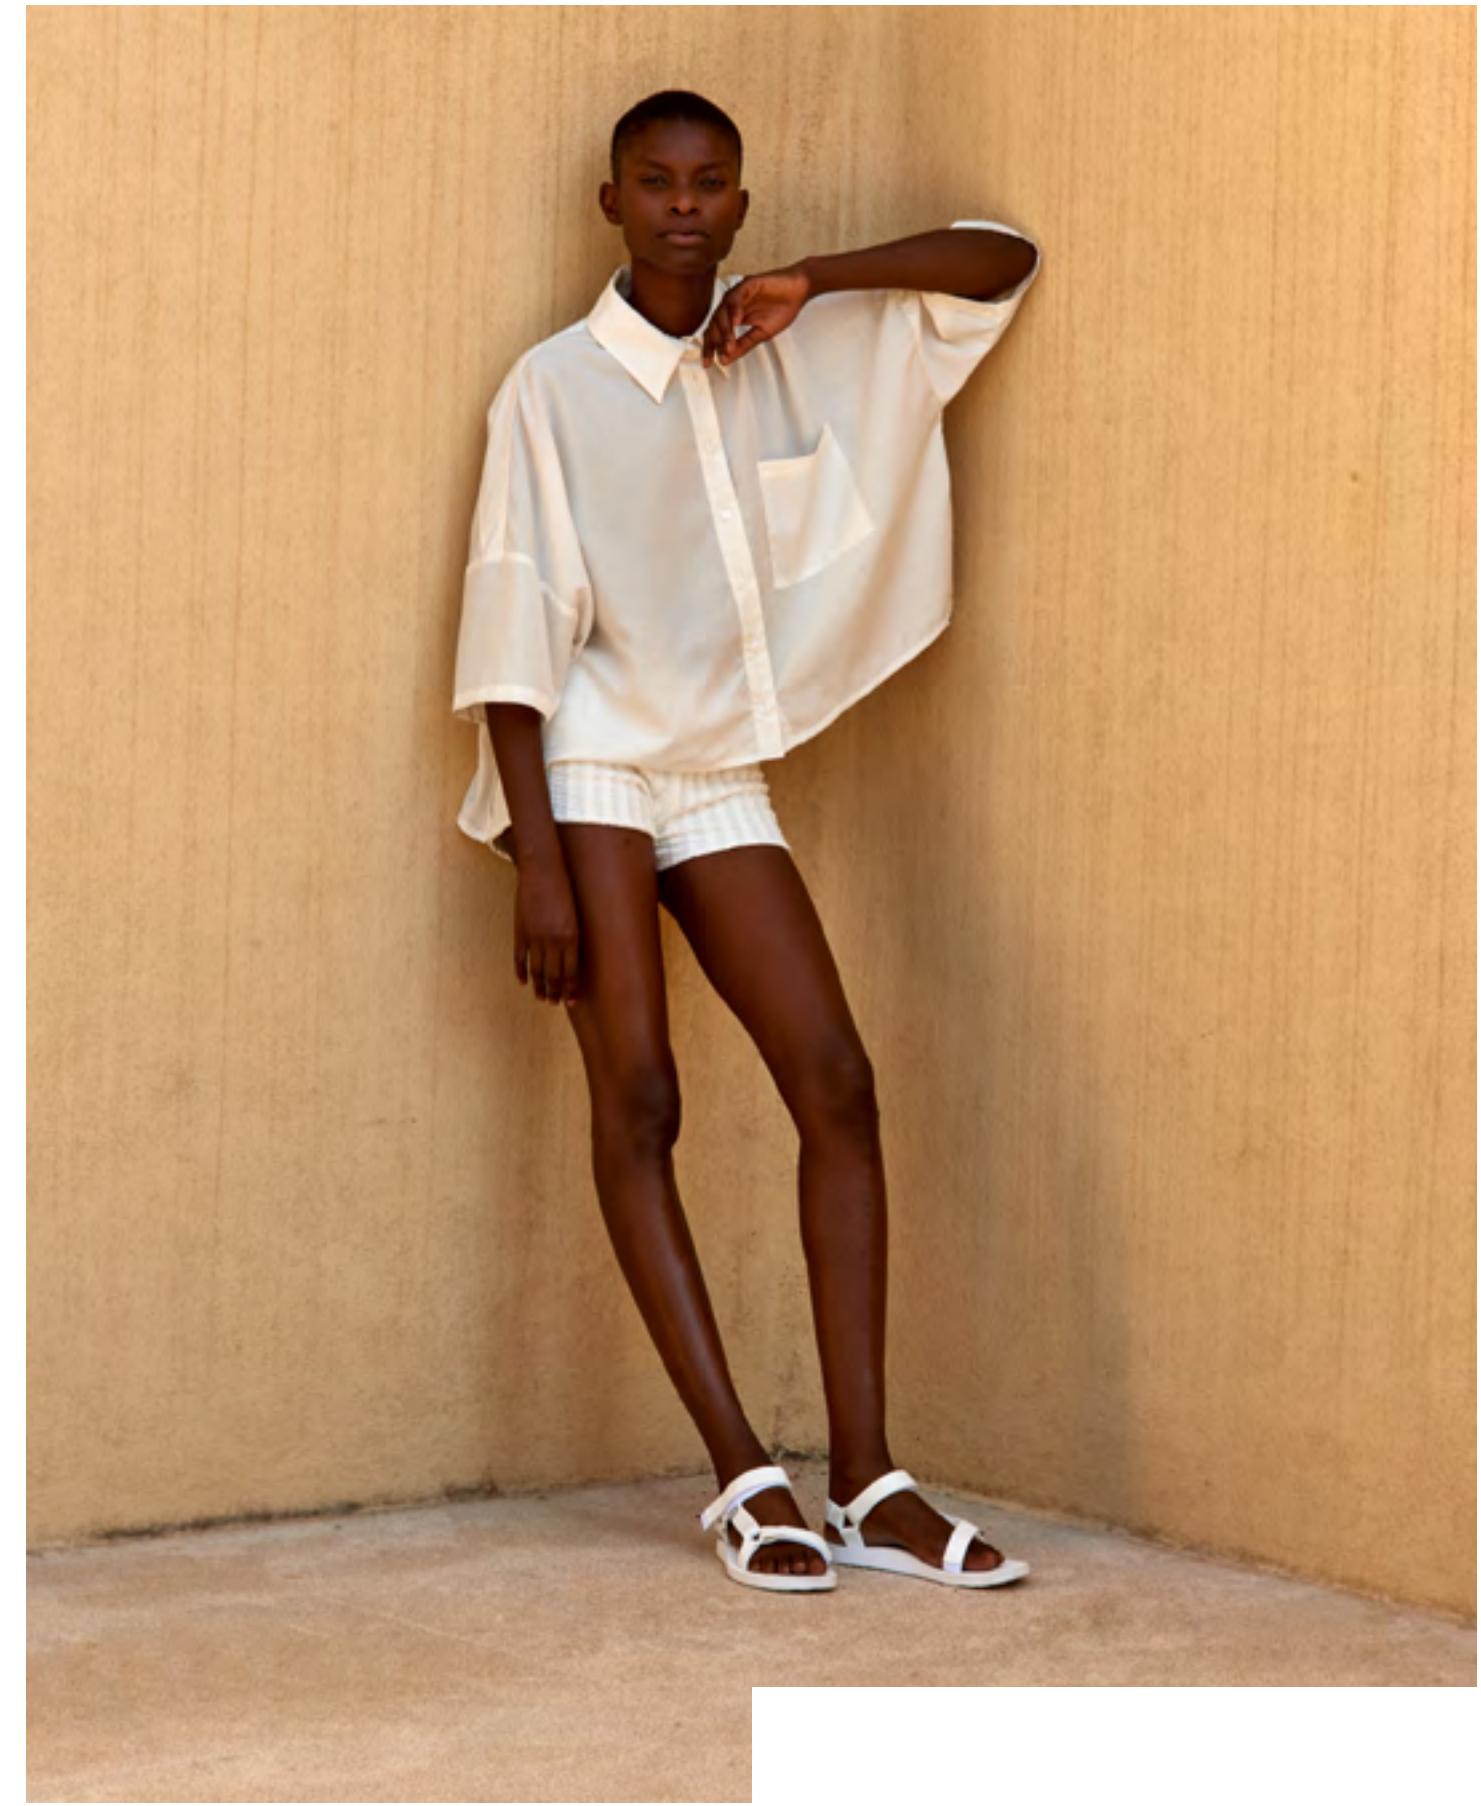

Parthenis' SS20 Collection unravels the mystery of unexplored paths. Enigmatic and sensual looks oscillate between dissonance and harmony.

**Un-
explored
paths.**

Enigmatic.

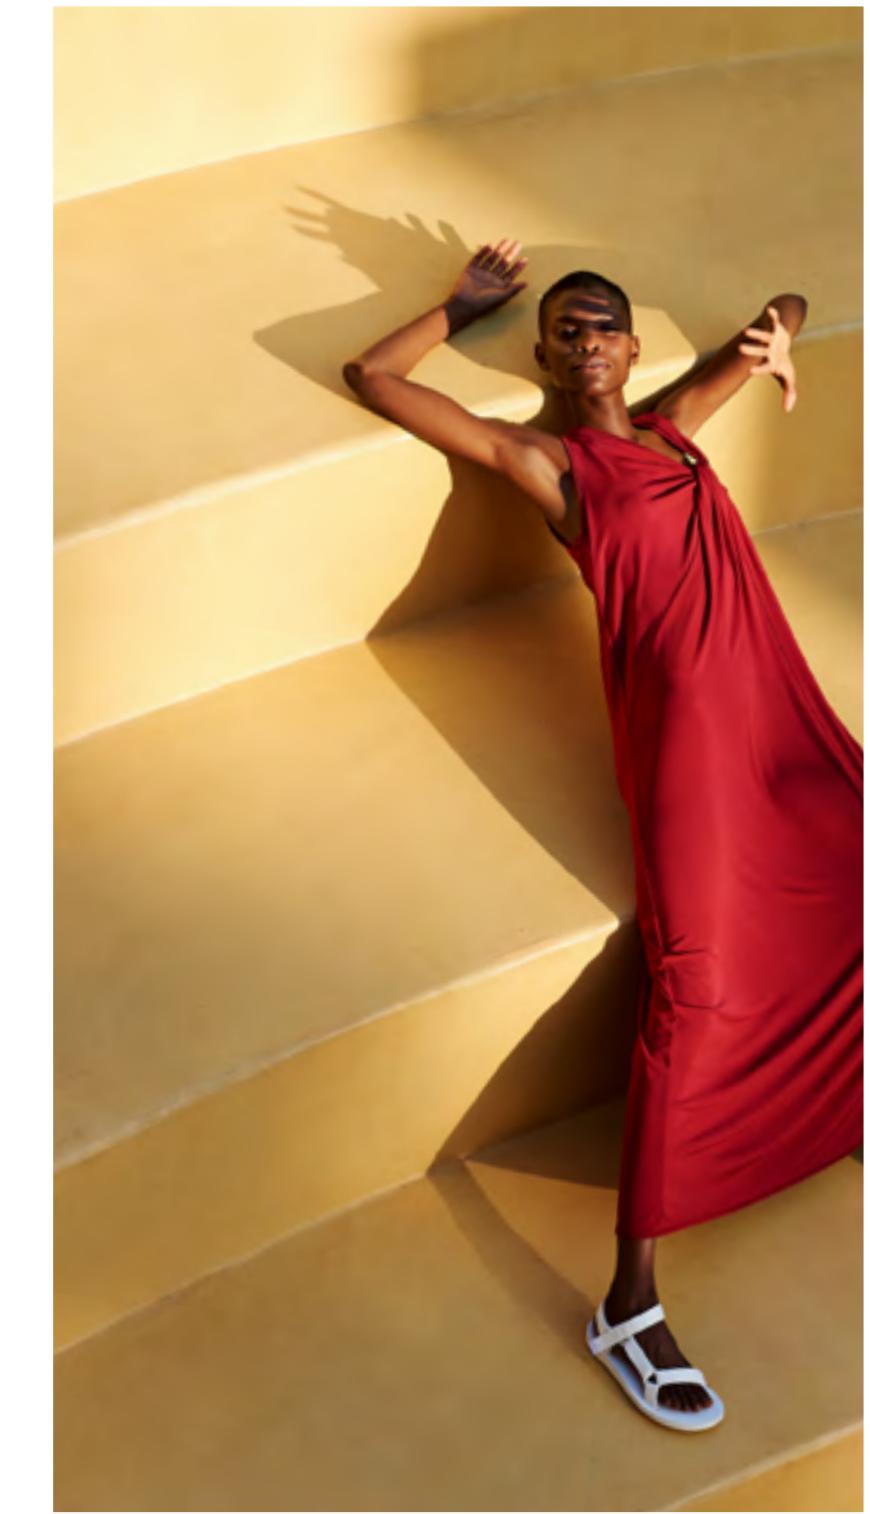

Parthenis

Ethnic references are fused with retro-futuristic elements. A mental landscape of an exotic North African dessert gradually converts to an ethereal sci-fi backdrop. Mysteriously powerful silhouettes form both the airy and austere lines of the collection captured in a futuristic military look.

Parthenis

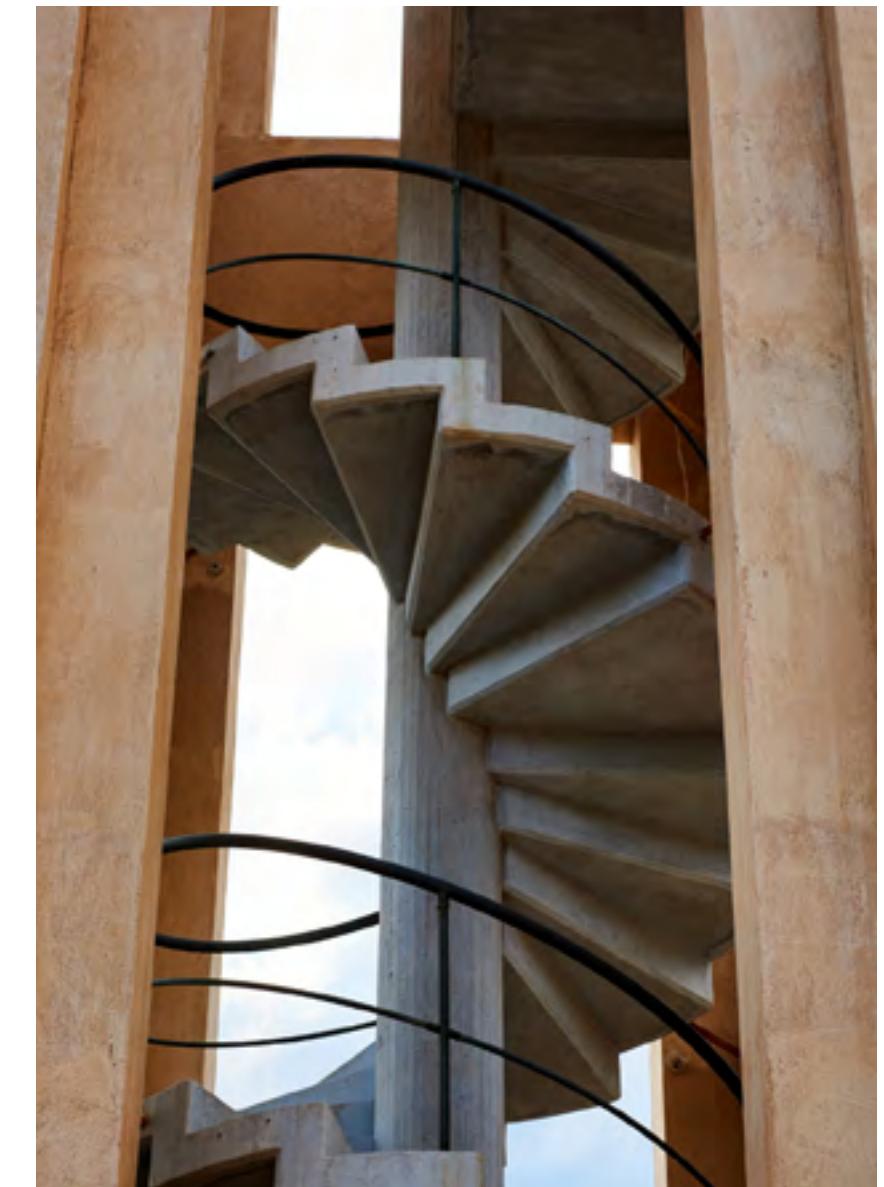

A palette of enchanting terracotta hues from its most earthy tones to its most vibrant reds are combined with black and white shades and set a harmonious tone with the lines of the collection.

Airy & austere.

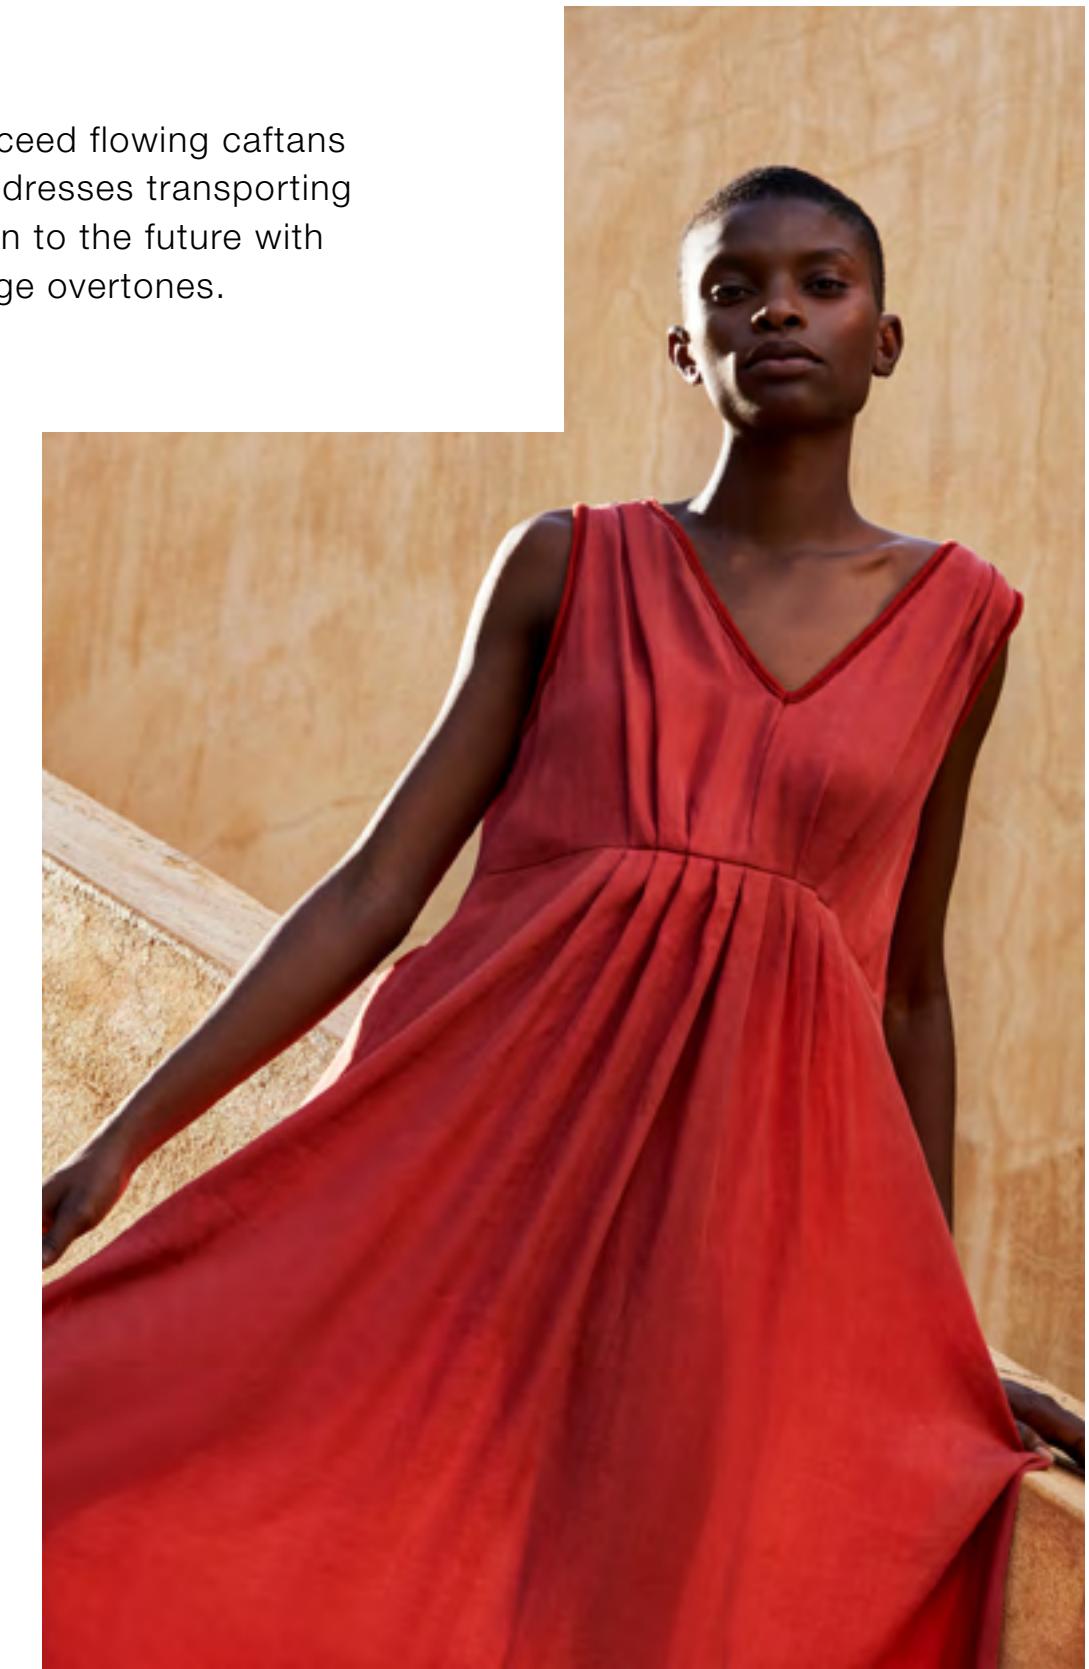

Less vivid but equally prominent khaki-beige and grey-pastel hues stand as a gentle contrast.

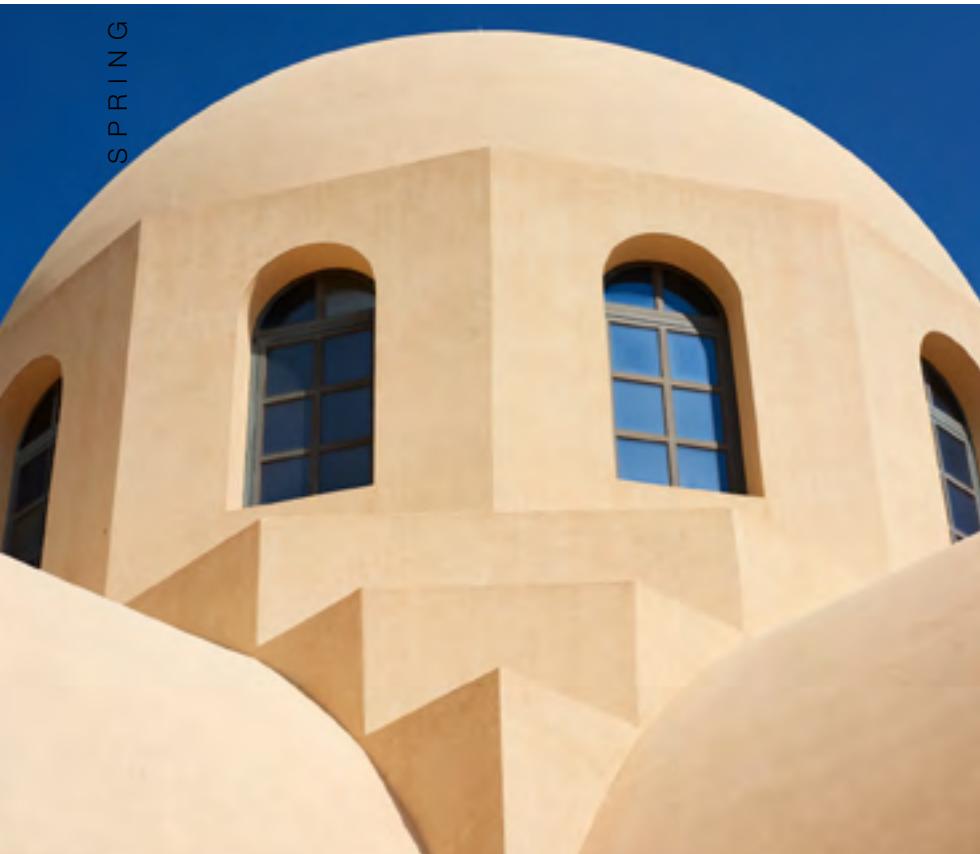

Utility lines succeed flowing caftans and loose maxi dresses transporting the imagination to the future with space age overtones.

**An
exotic
desert
aura.**

Pure linens, viscose with embossed ethnic patterns, jacquard stripes, satin and sheer cottons resonate an exotic desert aura, while more structured fabrics such as leatherette and metallic coated linen reflect futuristic tones. The collection becomes harmonized inviting the mind to lead a nomadic lifestyle away from the urban landscape and out of this world.
